## Business development, result of operations, financial position and net assets

### Business Development

The first quarter of the fiscal year brought significant changes from a macroeconomic perspective. The Russian war of aggression against Ukraine and the associated uncertainties on the international raw material and energy markets noticeably dampened the macroeconomic recovery after the Corona pandemic. At the same time, the changed geopolitical framework conditions have also led to a shift in the focus of political interest in many European countries to securing energy supplies. In Germany in particular, the existing energy supply is being put to the test and will in all likelihood undergo a fundamental reorganization in the coming years, which will require numerous additional infrastructure investments. Against this background, FRIEDRICH VORWERK, as a long-standing partner of the energy industry, continues to look positively into the future and expects an increasing market demand across all target markets.

In this environment, the FRIEDRICH VORWERK Group was able to achieve a record in order intake. In the first three months of the fiscal year, this amounted to €123.5 million, which corresponds to an increase of 90%. This includes the order to build a district heating pipeline in Hamburg with a volume of over €70 million. With an order backlog of €377.9 million at the reporting date, a new record was set.

While sales increased by 11.1% to €58.4 million (previous year: €52.5 million), adjusted EBIT decreased by €3.2 million to €5.4 million (previous year: €8.5 million) due to integration measures at the Gottfried Puhlmann Group, which was acquired in the previous fiscal year, and the simultaneous start-up of several major projects. While sales in the Natural Gas segment declined slightly by 10% to €32.4 million (previous year: €35.9 million), they increased in the Electricity segment by 42% to €10.4 million (previous year: €7.3 million) and in the Adjacent Opportunities segment by 101% to €14.3 million (previous year: €7.1 million). For the seasonally stronger summer months, we expect a further acceleration of revenue recognition and a return to the forecasted profitability level.

As of April 27, 2022, the FRIEDRICH VORWERK Group acquired Hempel Aluminiumbau GmbH, Storkow, a supplier of aluminum control cabinets. The company, whose products are used in some of our projects in the field of energy transformation, represents a strategic expansion of our existing portfolio of products and services and is thus part of our defined growth strategy. The company will be consolidated for the first time as of April 30, 2022.

The Management Board and Supervisory Board have proposed to distribute a dividend of €0.20 per dividend-bearing share for the financial year 2021 and to carry forward the remaining amount to new account. The dividend is subject to approval by the Annual General Meeting, which will be held in virtual form on June 1, 2022 due to the ongoing spread of the coronavirus.

## Result of operations, financial position and net assets

The results of operations, financial position and net assets of the FRIEDRICH VORWERK Group are positive. As of the reporting date of March 31, 2022, the order backlog amounted to € 377.9 million, while incoming orders totaled €123.5 million in the reporting period. Both figures have thus reached historic highs in the company's history. Of the order backlog, 46% is attributable to the Natural Gas segment, 10% to the Electricity segment, 3% to the Clean Hydrogen segment and 41% to the Adjacent Opportunities segment.

Consolidated sales of the FRIEDRICH VORWERK Group amounted to €58.4 million in the reporting period. This corresponds to an increase of 11.1% compared to the same period of the previous year (€ 52.5 million) and, in addition to the continued very strong market demand, is also attributable to the first-time consolidation of the Gottfried Puhlmann Group as of December 31 of the previous financial year and the better weather conditions compared to the previous year. On the other hand, start-up effects for major projects and a significant increase in Corona infections in the workforce had an opposite effect on total operating performance.

Revenue (adj.) by quarter  
in millions of €

Adjusted EBITDA (earnings before interest, taxes, depreciation and amortization) fell by €2.5 million to €9.1 million in the first three months (previous year: €11.5 million). The decline is mainly due to integration measures at the Gottfried Puhlmann Group and start-up costs for the recently acquired major district heating orders from the Adjacent Opportunities segment. The adjustments relate only to the previous year and consist of expenses of €3.2 million attributable to the IPO and income of €0.1 million from the change in the scope of consolidation.

EBITDA (adj.) by quarter  
in millions of €

After depreciation and amortization of €3.7 million (previous year: €3.0 million), adjusted EBIT amounted to €5.4 million (previous year: €8.5 million). The year-on-year increase in depreciation, amortization and impairment losses is mainly due to the higher level of investment activity in the past financial year. Adjusted net income after minority interests amounted to €3.4 million (prior-year period: €4.9 million) or €0.17 per share (previous year: €0.27 per share).

Equity amounted to €155.2 million as of March 31, 2022 (December 31, 2021: €152.5 million). In relation to the consolidated balance sheet total of €279.4 million (December 31, 2021: €290.5 million), the equity ratio as of the balance sheet date is 55.5%, compared with 52.5% as of December 31, 2021. The increase is mainly due to the current annual result.

As of March 31, 2022, the FRIEDRICH VORWERK Group has liquidity (including securities) of € 69.5 million (December 31, 2021: € 111.6 million). The decline in liquidity is mainly due to the negative cash flow from operating activities of € -30.5 million. The operating cash flow is characterized by a seasonal increase in net working capital over the course of the year, which was further intensified in the first quarter by the simultaneous start-up of several major projects in the energy grids area. Furthermore, operating cash flow in the first quarter was impacted by various temporary capital gains and sales tax effects (-€15.3 million), which partially offset over the course of the year. Another reason for the decline in liquidity is an increase in investment activity compared with the prior-year period. After deducting financial debt of € 25.9 million (December 31, 2021: € 28.0 million), net cash and cash equivalents amounted to € 43.6 million as of the balance sheet date (December 31, 2021: € 83.6 million).

## Outlook

Against the background of the very good order situation, management continues to expect total sales of over €320 million with an adjusted EBIT margin of 15% for fiscal year 2022.
